U. S. DOLLARS RISE.
(By Times Special Cable.)

Berne, Switzerland, via Paris, Jan. 8.—The American dollar is now at the rate of 25 centimes (11.10 francs). This represents a rise since the opening of the wheat chances on America yielded three francs 50 centimes (15.50 francs). The rise in exchange is due to heavy buying of grain in the market for Switzerland.

Mr. Priest, general secretary of missions for the Ontario conference, addressed the assembly on the subject of "Missionary Institutes." After considerable debate as to ways and means, comprising the question of whether it was expedient to further the plan, it was decided to hold a missionary institute on the afternoons and evenings of Monday and Tuesday, February 25th and 26th, and judging from the enthusiasm felt at the meeting, there is no doubt that the institute will be a great success. That this institute shall not be confined entirely to Sunday School workers, but an invitation is being extended to "Young People's Societies" and to all who desire to participate in the benefits of this institute. A cordial invitation is also being extended to members of
